

Benin Will Not Serve as a Land for Testing the Anti-Covid-19 Vaccine and the Deadly Vaccines of the Imperialists!

Philippe Noudjenoume

On the French television channel LCI on April 2, 2020, Jean-Paul Mira, professor of medicine and Head of the Resuscitation Department at Cochin Hospital in Paris, and Loch, Director of Research at INSERM (National Institute of Research and Medical Studies) made remarks that were at the very least shocking and inadmissible for the human conscience. They simply state that it is necessary to test anti-coronavirus vaccines in Africa. In other words, to make Africans "laboratory rats" for the big pharmaceutical companies. It is rumoured that African countries have already accepted this sordid and criminal operation. From everywhere, there was a massive reaction against the attempt. Even the government of Patrice Talon (President of Benin – *translator's note*) through his spokesperson had to declare: "it is out of the question that they will come here to test... a vaccine that could have hazardous results on the Beninese population". Very good! The protest clamour was so strong that the two experts tried to backtrack, getting themselves into more trouble: "Sorry, if my words were not clear" – so they say!

But if the above statement has any merit, it is to make public the intentions (expressed or not) and the practices of the States and international institutions against the African people for a certain number of years with the tolerance, if not the complicity of the leaders of our countries.

Already a few months ago in Paris, "a conference brought together a panel of white participants, to think about more effective ways to reduce the black population in Africa. One of the conference organizers, a historian and associate professor of African history, Bernard Lugan said: "Population growth in Africa is a threat to European civilization ... **I do not recommend dropping a nuclear bomb on the Africa, but we cannot wait to see this population growth close to Europe.** This is a danger we must take seriously....The Plan is to more closely organize private and public organizations in the Western countries to provide money and logistics for faster and more effective actions to curb the "frightening" growth of the African population" (CPCM Social Networks Forum of March 3, 2020).

Everyone has heard the declaration of French President Emmanuel Macron as soon as he came to power on the "demographic danger" in Africa. African heads of state relayed this statement and even called for a conference on African demography. However, a simple comparison with other continents shows that the African continent, due to slavery and colonization, is the least populated continent on the planet; that Niger, Mali, Chad and Mauritania together, with an area of 4.8 million km² together have only 64 million inhabitants, while the European Union with an area of 4.5 million km² (slightly smaller) has 446 million inhabitants, that even the forested countries such as Gabon, Democratic Congo, Congo Brazzaville do not have a greater population with 3 million km² with hardly more than 94 million people (Source UNFPA – United Nations

Population Fund, World Factbook). So where is the problem? Why these loud shouts about (against) demography in Africa? Is this in the interest of the African people? No way.

People of Benin!

Citizens of the World!

These are not simple statements with which we are afflicted, the words are preceded and followed by practices and programmes minutely concocted by the most noble international institutions in the world (WHO, UNFPA, UNICEF, USAID – US Agency for International Development, AFD – French Development Agency), to reduce the African population. They do it through vaccines without the knowledge of the people. They will vaccinate for everything: polio, tetanus, diphtheria, whooping cough, hepatitis, etc. The Expanded Programme on Immunization (EPI) follows one another non-stop. And with our consent. Is this beneficial? It is not sure. The case reported by the Catholic Episcopal Conference of Kenya in 2015 has never been denied. Under the guise of vaccinating girls against tetanus, organized by the WHO and UNICEF in Kenya, the vaccine was found to contain "24 to 37.5% human chorionic gonadotropic beta hormones (BhCG), an amount large enough to cause sterility in patients." (International Voltaire Conference Network, "WHO and UNICEF have sterilized third world populations under the guise of vaccination", February 26, 2015).

One cannot help but point out "The Coast Project", developed by the white racist authorities of South Africa, a biological and bacteriological weapons programme targeting only the black population in order to sterilize the black women of that country. We cannot ignore the historic example of the genocidal extermination carried out in Argentina where of nearly twelve million blacks in that country at one time, there are currently only 150,000 Afro-Argentines!

The black race is the scapegoat of humanity.

The fashionable slogan is, "demographic dividend". What is the demographic dividend? It is rapid economic growth resulting from changes in the age structure of the population of a country, due to a decline in fertility and mortality. However, we know that without meeting certain conditions (monetary, educational, linguistic, ownership of the means of production, production and distribution of wealth, etc.), even with the decline in fertility, no economic development is possible. How can one work to reduce our populations when at the same time, the French Treasury is confiscating our currency? Speaking about the human factor, reducing the number of mouths to feed while completely obscuring the pillaging of the wealth of the population by the great imperialist powers is simply genocidal. If Niger's uranium and gas and oil revenues went to the people of Niger, if the people of Niger had monetary sovereignty, the country's 23 million inhabitants would live in comfort and development.

People of Benin!

Citizens of the World!

In Benin, are things better? Certainly not. We cannot say this mainly because we do not know the independent structures of control of vaccines such as the good initiative of the Catholic Episcopate of Kenya. Nothing can ensure the safety of the vaccines that we give to our children. For example, how do we know that the vaccination crusade against the Human Papilloma Virus

against cervical cancer in girls aged 9 to 13 years operated from May 24 to 26, 2016, under the aegis of UNICEF, is safe for our children.

The aim to reduce the African population is so manifest among our Dominators that they use all pretexts to achieve their ends. For this, they disguise these operations with apparently noble humanitarian intentions. They never say that they want to reduce the population. They simply say that it is "to reduce maternal mortality by spacing births"; that "it is to avoid unwanted pregnancies". They say, "It is to reduce pregnancy in the school environment." With these arguments, who is going to be against it? We applaud and we move on. Housewives are sterilized without the husbands giving their opinion, leading to serious family problems. Girls 14-years old are extensively sterilized in schools. The officials of the village health centers (as at Mono under the direction of the Departmental Director of Health), are asked by the village chiefs to call on women to come to be sterilized. It is free; but if the woman wants to have the undo the sterilization, then she must pay money! In other words, sterilization is free, but de-sterilization costs. However, the harmful effects, for example, of the use by women of pills and other contraceptive methods are now known: "breast cancer, stroke, depression, endometriosis, reduced libido, food allergies" (See Sabrina Debusquat in her testimonial book "I Stopped Using the Pill" (Paris-Match October 28, /2017)

In this operation of African depopulation, another method is used: **the caesarean**. Caesarean section has been adopted despite side effects! Who would be against caesarean section to save the lives of our women in labour? No one. Still it would have to be used only in cases of extreme necessity. Because, as we read in "Science and the Future" number 873 of November 2019: "The intestinal flora of babies born by caesarean section have fewer bacteria beneficial for health. And as S. Laibi says (The bankruptcy of the modern world, 2013): " There are risks for babies born by caesarean section...: respiratory distress, death, etc." without hiding the negative consequences for the woman who have had caesareans. But the other consequence is that the same woman cannot have more than three caesarean sections. What a boon for those who want to "limit" births (to three children); how good this is? And for this, the donors are ready to finance free access. We rely on family planning with the ABPF (Beninese Family Planning Association) in control. Funding for this is coming.

Have we ever seen anything free from developed countries to poor countries? Never. Everything that is free is poisoned.

The consequences are already being felt in Benin. In certain regions of our country, we are already seeing a worrying deceleration of the population due to a severe decline in births. In the commune of Athiémé (Mono) for the districts of Atchannou and Kpinnou, the growth rate between censuses (RGPH – General Census of the Population and Environment – of 2002 and RGPH 2013) is 1.81%, the lowest rate in the department of Mono, in which the growth rate is 2.5% for an average national rate of 3.25%". The sterilization campaigns of organizations like the ABPF have gone through this.

The devastation has begun.

The objective in reality is to reduce the African population by a eugenics and genocidal plan. Did the many diseases ravaging Africa just happen? The new diseases, AIDS, Ebola, Lassa, etc. and cancer, female and male infertility, diabetes, etc. Yesterday was the yellow peril, today it is the black peril to be fought by the dominating Powers, which amounts to racism. Ultimately, depopulate Africa to occupy our territories.

People of Benin!

Citizens of the World!

In the light of all these considerations, for a simple question of precaution and humanitarianism (because whoever is bitten by a snake fears the earthworm that is said to be in Benin), the following ethical requirements should be imposed:

1 – Benin will not serve as a land for testing the anti-Covid-19 vaccine.

2 – I can affirm today with regard to all the investigations both national and international, with regard to the exponential growth of various degenerative diseases, cases of cancer, male and female infertility etc., that a good number of vaccines inoculated on our African populations, are legitimately suspected of causing health problems, that they are poisons to reduce fertility and carry out genocide in Africa. As a result now,

3 – Any vaccine, before being injected into the population, must be checked by an (independent) Scientific and Bioethics Committee made up of biochemists, virologists, doctors, etc. responsible for monitoring all vaccines and publishing the results before any inoculation in Benin. **Without this precaution, anyone will have the right to object to such unmonitored vaccination operations.**

4 – The “family planning” system as organized in Benin under the leadership of Organizations such as USAID with the American NGO PRI (Population Resources Institute), UNFPA, AFD etc. with their Beninese instrument, the ABPF is suspected to be a major genocidal criminal operation, an operation to drastically reduce the Beninese population, with the active support and complicity of the various governments of Benin.

5 – All family planning must meet the following conditions:

a – Undergo analysis and monitoring in advance by the Independent Bioethics Committee of substances to be taken or placed in women, with the results made public to the population.

b – All family planning decisions and their consequences must be carried out with the consent of the two spouses, the woman and husband, for the harmony of Beninese couples.

First Secretary of the Communist Party of Benin

President of the Patriotic Convention of the Left Forces.
